Name of Personnel: **MOHD AFROJ**	
Title: **Full Stack Developer**	
Contact: **7838799646, mohd.afroj@gmail.com**	
Years with Firm: **13**	Country/City, State of Residency: **India/Delhi, Uttar Pradesh**

Education/Qualifications: (Summarize college/university and other specialized education of staff members, giving names of schools, dates attended and degrees, certification, professional qualifications obtained.)

- Master in Computer Application, Computer Application. GBT University, Lucknow, India. Jul 2010
- TCS iON Career Edge - AI Foundation Certification
- Python Essentials 1 Certification

Employment Record: (Starting with present position, list in reverse order, relevant employment experience. Give dates, names of employment organizations, title of positions held and location of employment.)

- **02/2025 - Present:** Auriopro Solution Ltd, Full Stack Developer, New Delhi, India
- **04/2024 – 08/2024:** CIPL, Senior Full Stack Developer, New Delhi, India
- **12/2019 – 11/2023:** AAPC Pvt Ltd, Senior Software Engineer, Noida India
- **05/2017 – 11/2019:** Perfume Booth Pvt Ltd, Senior Software Engineer, New Delhi, India
- **01/2013 – 04/2017:** B. Jain Publishers Pvt Ltd, PHP Developer, Noida, India

Technical Skills: (List out your technical skills sets in order or in a categorized order and highlight your predominant skills)
Primary Skills: React.js, JavaScript, TypeScript, Vue.js 3, Python, FastAPI, Node.js, NestJS, Laravel, PHP.
Backend & Architecture: REST APIs, Microservices, Kafka, Redis, gRPC(protobuf and contact), OAuth 2.0, JWT, RBAC, Event-Driven Architecture, pub/sub, Elasticsearch, Queue Processing.
Frontend: Vue 3 Composition API, React, Angular, Pinia, Vue Query, Tailwind CSS, Vite, VeeValidate, vue-i18n.
Databases: MySQL, PostgreSQL, MongoDB, Redis, SQL, Database Design & Optimization.
Cloud & DevOps: Docker, Docker Compose, AWS, Azure, GCP, Jenkins, Git, GitLab, GitHub.
ETL & Data Integration: ETL, Data Migration, Data Extraction/Transformation/Loading, Batch Processing, API Integration, Kafka, Data Validation, Data Mapping, Incremental Processing, Error Handling, Retry Mechanisms, DLQ, Idempotency, OAuth 2.0.
AI: Generative AI, RAG, AI Agents, Agentic AI, LLM Integration, Claude AI, Gemini, Cursor, GitHub Copilot.
Tools & Practices: JIRA, Confluence, Postman, Figma, Agile/Scrum, Unit Testing, Integration Testing, E2E Testing, Code Review, Performance Optimization, Production Support.

Experience: (Detail the types of activities performed, degree of responsibilities, location of assignments and any other information or professional experience considered pertinent for this assignment.).

- Over 12+ years of progressive experience in software analysis, design, development, testing, deployment, and maintenance of enterprise-grade web applications and digital products.
- Strong experience as a Full Stack Developer specializing in **JavaScript/TypeScript, PHP, Python**, with expertise in **Vue.js 3, React.js, Angular, Node.js, FastAPI, NestJS, Laravel, and CodeIgniter**.
- Extensive experience designing and developing scalable **RESTful APIs and microservices** using FastAPI, NestJS, Node.js, Laravel, and PHP, with focus on performance, security, maintainability, and reusability.
- Hands-on experience with modern frontend development using **Vue.js 3 Composition API, React.js, Angular, TypeScript, JavaScript, Tailwind CSS**, and component-based architecture.
- Experienced in developing end-to-end enterprise applications, working across the complete technology stack from **database and backend services to APIs, frontend applications, testing, deployment, and production support**.
- Strong experience in designing and implementing **microservices-based architectures**, reusable backend services, shared frontend packages, API integrations, authentication, authorization, and inter-service communication .
- Experience developing secure and reusable **encryption and security utilities**, including AES-GCM based data encryption, secure API communication, authentication, RBAC, and protected application workflows.

- Extensive experience working with relational and NoSQL databases including **MySQL, PostgreSQL, MongoDB**, along with **Redis** for caching and high-performance data access.
- Strong knowledge of database design, complex SQL queries, indexing, transactions, data validation, optimization, migrations, and performance tuning.
- Experience integrating enterprise and third-party systems through **REST APIs, webhooks, asynchronous messaging, OAuth 2.0, JWT, and service-to-service authentication**.
- Hands-on experience designing highly available and scalable backend systems using **load balancing, asynchronous processing, queues, Kafka, Redis, retry mechanisms, idempotency, dead-letter queues, and controlled worker concurrency**.
- Experience developing and consuming APIs for large-scale enterprise and government applications, including workflows involving **member onboarding, attendance, claims, committees, notifications, digital signatures, and other business modules**.
- Experience working with modern application state management and data-fetching technologies including **Pinia, Vue Query**, and reusable frontend component architectures.
- Strong experience implementing frontend form validation and complex user workflows using **VeeValidate, Yup, Vue Multiselect, Headless UI**, and reusable UI components.
- Experience with **internationalization (i18n)** and development of multilingual applications supporting English and Indian-language user interfaces.
- Experience implementing responsive and accessible user interfaces with attention to **WCAG/accessibility requirements, keyboard navigation, semantic HTML, and accessible form controls**.
- Hands-on experience with **Docker and containerized application development**, including Docker Compose-based development environments and containerized backend, frontend, database, Redis, and supporting services.
- Experience working with cloud platforms and services including **Google Cloud Platform (GCP) and Microsoft Azure**, with understanding of cloud-based application deployment and infrastructure.
- Strong experience with **Git and Git-based development workflows**, including branching, merge/rebase workflows, code reviews, package management, and CI/CD-oriented development practices .
- Experience in software development methodologies including **Agile, Scrum, iterative development, code reviews, unit testing, integration testing, and end-to-end testing**.
- Hands-on experience with **AI-assisted software development**, using tools and platforms such as **Claude, Claude Code, GitHub Copilot, Cursor, Antigravity, Haiku, and other AI coding assistants** for code generation, refactoring, debugging, documentation, architecture exploration, testing, and code review.
- Strong focus on writing **clean, reusable, modular, maintainable, and testable code**, with emphasis on scalability, security, performance, and long-term maintainability.
- Resourceful and adaptable Full Stack Developer with strong analytical, problem-solving, debugging, communication, and technical leadership skills.

Full Stack Developer
Auriopro Solutions Ltd, New Delhi, India 02/2025 - Present

- Spearheaded full-stack development for the Sampoorn Digital Sansad project, delivering highly secure and scalable digital solutions for Parliament House clients.
- Engineered robust REST APIs utilizing **FastAPI, NestJS, and Laravel** to power critical system modules, including member onboarding, attendance tracking, claims processing, and committee management.
- Designed and implemented reusable **AES-GCM encryption utilities** across frontend and backend systems, ensuring strict data security and seamless integration across microservices.
- Implemented Redux Saga's with actions and reducers to implement a sync API call.
- Accelerated the software development lifecycle by integrating AI-assisted workflows, driving rapid prototyping, advanced debugging, and code optimization for high-performance modules.
- Made use of redux saga middleware to access redux application state and dispatched redux actions.
- Experience in PostgreSQL management, including data modeling, query optimization, and performance tuning.
- Developed User Controls, improved the performance of the application by configuring the caching.
- Created login-based member's area that displays pages based on access levels and assigned Roles.
- Involved in developing single-page applications using React.js/Vue.js 3 and RestFull API's and Developed reusable custom components using React.js and VUE.js 3 with Typescript.
- Developed microservice on boarding tools leveraging Python and Jenkins allowing for easy creation and maintenance of build jobs and Kubernetes deploy and services.
- Create custom workflow by overriding standard business logic using Python/FastAPI, NestJS and Laravel.

- Experience in developing customized and distributed applications using User and Custom Controls.
- Performs other duties and tasks as assigned or directed.
- Implemented Client side and server-side validations done using JavaScript and Validation Controls.
- Environment: React, Vue.js, Python, FastAPI, Node.js, NestJS, Laravel 11, JavaScript, CSS, REST APIs, gRPC, Webhooks, Microservices, Micro Frontends, MeiliSearch, AES-GCM Encryption, Git, Docker, AWS Cloud Services,CI/CD, Agile

Senior Full Stack Developer

Corporate Infoteck Pvt Ltd, Noida, India, 04/2024 – 08/2024

- Design and develop web-based solutions through all the SDLC phases including business requirements gathering, front end web pages' design and implementation, database implementation, testing, prepare technical and release documentation.
- Spearheaded the end-to-end technical revamp of the UPSC Portal, delivering a highly scalable, secure, and modern web architecture.
- Engineered high-performance, scalable modules utilizing **React**/**Vue** for the frontend and **Python**/**FastAPI** (or **Node**/**NestJS**) for the backend, focusing on reusable micro-frontend components and robust REST API design.
- Implemented custom JavaScript date time picker (from Bootstrap) to pick to and from date calendar which gives a string to the input field.
- Develop relational data models and database objects such as tables, views, indexes, stored procedures, triggers, functions.
- Worked on capturing the user events and rendering the appropriate action and dynamically rendering the UI based on user actions using React.js.
- Responsible for developing the presentation layer using HTML, CSS, JavaScript and react.js.
- Knowledge of PostgreSQL/MySQL, enabling seamless integration between the application and the database.
- Designed Frontend within object-oriented JavaScript Framework like React.JS.
- Developed certain features of the application functionality i.e., CRUD (Create, read, update, delete) features using React.js, Express.js and Responsive Design.
- Used Object Oriented Analysis Design (OOAD), Object Oriented Programming (OOPS).
- Worked in Agile Software, and Test-Driven Development (TDD), conducting Code/Test Case review meetings, participated in daily SCRUM meetings.
- Environment: React.js, Python, FastAPI, Node.js, ExpressJS, JavaScript, CSS, REST APIs, gRPC, Webhooks, Microservices, Micro Frontends, Git, Docker, AWS, CI/CD, Agile.

Senior Software Engineer

AAPC India Pvt Ltd, Noida, India 12/2019 – 011/2023

- Application components are developed in an agile environment utilizing a Test-driven development approach.
- Accelerated the delivery of business-critical features by rapidly adapting to changing Agile sprint requirements and resolving high-priority tickets without disrupting team velocity.
- Involved in modifications to the XML requests and response as per the Business Requirements.
- Developed views, modal popup, search filters, sorting of data in grid with HTML5, CSS3, JSON, and React.
- Design and developed various views using JavaScript, JSON, jQuery, Ajax Helpers, and Bootstrap.
- Developed high-performance, scalable web application modules utilizing **React** for the frontend and **FastAPI**/**ExpressJS** for backend services, focusing on reusable code and microservice architecture.
- Developed HTML5, JavaScript for client-side presentation & data validation on client side within the forms.
- Involved in developing UI pages using HTML5, CSS3, JAVASCRIPT, JSON, JQUERY, ReactJS, and NodeJS.
- Created Menus and Drawer components by using HTML5, CSS3, Bootstrap, JavaScript, JQUERY.
- Designed and wrote complex queries, stored procedures, functions, and packages to store information from various sources for risk analysis using MySQL.
- Used GIT as a source control before we switched to Team Foundation Server (TFS) for version control of the source code along with the maintenance of the builds and the relevant documents of the same.
- Environment: Python, PHP, JavaScript, React JS, MySQL, MongoDB, CSS3, Bootstrap, HTML5, Zend Framework, SOAP, REST, gRPC, Elasticsearch, jQuery, JSON.

Senior Software Engineer

Perfume Booth Pvt. Ltd., New Delhi, India. 05/2017 – 11/2019

- Responsible for maintenance of applications with technologies such as PHP/MySQL Server/jQuery/HTML5/JavaScript/Angular/Bootstrap.
- Built Angular 13 components, UI, and services to consume rest services using component-based services provided by Angular 13.
- Prepare and dispense work assignments, provide guidance, and/or review the work of other team members.
- Improved the performance of the application by configuring the caching.
- Created login-based member's area that displays PHP pages based on access levels and assigned Roles.
- Involved in development of forms for Application Process and Selection process in Angular 13.
- Design & develop solutions using CakePHP, Angular JS, MVC, HTML5, MySQL Server. Experience in cloud Technologies like GCP.
- Code and test task management logic for mobile embedded voice messaging units using Python, Eclipse/PyDev, proprietary libraries, TCP/IP sockets barcode scanning and state management.
- Extensively Used. PHP and Angular controls like Master Page Templates, Menu Controls, Grid View Controls and File Upload Controls.
- Environment: PHP, Angular, JavaScript, MySQL, MongoDB, CSS3, Bootstrap, HTML5, CakePHP Framework, REST, jQuery, JSON.

PHP Engineer

B. Jain Publishers Pvt. Ltd., New Delhi, India. 01/2013 – 04/2017

- Responsible for maintenance of applications with technologies such as PHP/MySQL Server/jQuery/HTML5/JavaScript/Angular/Bootstrap.
- Prepare and dispense work assignments, provide guidance, and/or review the work of other team members.
- Improved the performance of the application by configuring the caching.
- Created login-based member's area that displays PHP pages based on access levels and assigned Roles.
- Involved in development of forms for Application Process and Selection process in CodeIgniter.
- Design & develop solutions using CodeIgniter, MVC, HTML5, MySQL Server.
- Extensively Used. PHP and CodeIgniter controls like Master Page Templates, Menu Controls, Grid View Controls and File Upload Controls.
- Environment: PHP, JavaScript, MySQL, MongoDB, CSS3, Bootstrap, HTML5, CodeIgniter Framework, REST, jQuery, JSON.

I, the undersigned, certify to the best of my knowledge and belief, this bio data is accurate and confirms my availability.

MOHD AFROJ

Signature of Personnel or Firm Representative

11/04/2026

Date (Month/ Day/Year)

Suitability: (Briefly explain why this profile is a good fit for this role.)

Mohd Afroj is an accomplished **Senior Full Stack Developer** with over **12 years of progressive experience** in designing, developing, and delivering enterprise-grade web applications and digital products. His expertise spans **Vue.js 3, React.js, Angular, JavaScript/TypeScript, Python, FastAPI, Node.js, NestJS, Laravel, and PHP**, enabling him to build scalable end-to-end solutions across frontend, backend, APIs, and databases.

He has extensive experience developing **REST APIs, microservices, event-driven integrations, ETL/data migration workflows, Kafka-based asynchronous processing, webhooks, OAuth 2.0, JWT authentication,**

RBAC, and secure application architectures. His database experience includes **MySQL, PostgreSQL, MongoDB, and Redis**, with strong knowledge of database design, transactions, query optimization, batch processing, data validation, and failure/retry handling.

Mohd has worked on large-scale **enterprise and government digital platforms**, collaborating with Business Analysts, Product Managers, Staff Engineers, UI/UX teams, and client stakeholders to translate business requirements into scalable technical solutions. He has experience owning features across the complete development lifecycle, from **requirements analysis and architecture through development, testing, deployment, and production support**.

He also has hands-on experience with **Docker, AWS, Azure, GCP, Git, CI/CD, Agile/Scrum**, and modern observability and distributed-system concepts. In addition, he is expanding his expertise in **Generative AI, RAG, AI Agents, Agentic AI, LLM integration, and AI-assisted software development**, using tools such as **Claude, Claude Code, Cursor, and GitHub Copilot**.

His combination of **full-stack engineering, backend architecture, data integration, cloud technologies, and AI-assisted development** enables him to contribute effectively to complex, scalable, and high-performance enterprise applications.
